

FUGENPLAST

FUGENPLAST *Joint ribbon*

FUGENPLAST is an expandable joint filler and cap. It is used to seal expansion joints.

Due to the special shape it enables to maintain position without coming out or dropping down into the joint.

Elastic PVC material, easy installation. Ideal solution to fill up joints, protect from dust and from other improper material and protect edges too.

RANGE OF PRODUCT:

FUGENPLAST can be supplied in a variety of sizes depending on the size of the cutting disc.
